Stalke Out of Space Project #24

Selection of the Gallery program

1999

As part of Stalke Out of Space Project #24, Stalke Galleri presented a selection of works from the gallery's program at Liste Basel 1999. The presentation reflected Stalke's ongoing interest in spatial strategies, narrative imagery, and the dialogue between painting, drawing, photography, and installation within a temporary exhibition context.

The project was noted in contemporary press coverage of Liste Basel 1999. In an article published in BZ and written by Robert Schiess, Stalke Galleri's contribution was referenced in relation to the fair's emphasis on alternative exhibition formats and the exploration of space and perception among younger international galleries.
